Res ondent

Response

it was very hard to hear him and also make out what he wrote.

Please continue using slides it is easy to understand

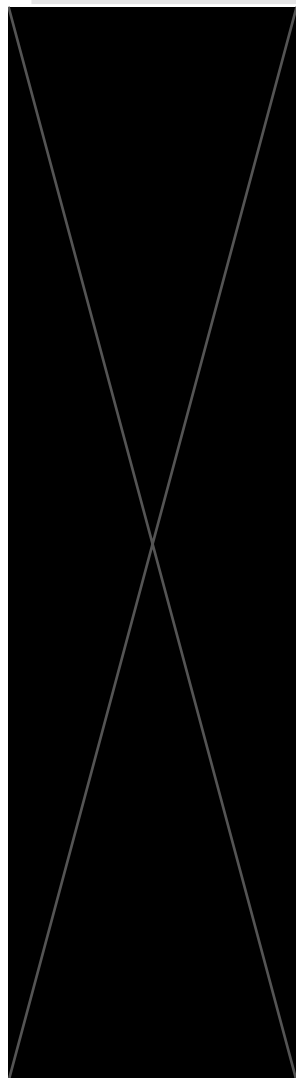

Can the slides of what is going to be covered be shared before the lecture occurs? That would help us fully focus on the content rather than taking notes

a mix of handwritten and slides would be good as the already written notes becomes kind of monotonous and bookish reading.

Could you please before going deep into formal definitions can we get some

## Respondent

## Response

high level picture, visualisation and motivation/uses of that etc.

I understood most of the lecture until the very last few minutes,because it felt like you just jumped up in speed at the end,so I didnt really understand what was happening then(its cleared now,read the text)

good class

The class started off very slow but the pace on the "slides" half was pretty good. I think using your notes to cover concepts, then giving us time to write the notes down ourselves and maybe working out examples (with numbers) on the board will help.

:D

Sir if u can use the blackboard, it would be the best , because what i feel is on an blackboard we can make our own notes and our attention is better focused on the blackboard, please use the blackboard sir.

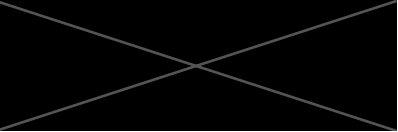

Sir its good if you send the notes you prepared(or slides) too we have difficalty to understand the hand writing. and before every class we can just a quick recape of last class.

Sir please can you teach at a lower speed as it is fast

The handwritten one are better than slides as it gives more time to think and also we are able to make notes in the class itself but today the writtings were not copied to the projector properly which made it difficult to understand what's written.

I read the book before coming to class and yes I understood what you taught today but I would really love to get more insights about LA to what given in book.I do understand it that explaining basics before getting to advanced part is crucial.

Respondent	Response
	crucial. Its better if you can write on the black board rather than using an iPad to do that.

We apologise for the technical issue today.

But this gives us a good opportunity to ask whether you prefer the first mode (where everything was done live, and things were written by hand) or if you prefer the second mode (where existing notes were presented—what we are calling "slides" for now)?

Response	Average	Total
Handwritten	<div><div></div></div> 30%	25
"Slides"	<div><div></div></div> 38%	32
Both are fine	<div><div></div></div> 32%	27
